

Dear patients and parents,

The health and safety of our patients at Awesome Kids Teeth is our highest priority. We will continue normal operations in our dental practice. We do ask if your child has a cough or a fever, to please call the office to reschedule the appointment.

Our office follows stringent infection-control measures to ensure that we can continue to deliver high-quality patient care during periods of heightened illnesses, such as COVID-19, without compromising patient and provider health. After each patient, we wipe down all dental chairs, countertops, etc with hospital grade hard surface disinfectants. As always, masks, gloves, eyewear and lab coats are always in use and changed with each patient. Instruments are sterilized in between each patient.

We continue to actively monitor developments related to the coronavirus.

Any questions, please feel free to call our office with any questions you may have.
